CONFERENCE SCHEDULE

SATURDAY 7TH AUGUST - THE SECRET SPACE PROGRAM

08:00 - 09:00 Doors Open

Conference Registration begins at 8:00am

09:00 - 10:15 Andrew Johnson (UK)

"The Case for Antigravity"

Synopsis: Just imagine the difference working antigravity technology would make to our world - perhaps almost effortless travel - at enormous speed. In this presentation, we ask has working antigravity technology been developed. Is it already in use?

10:30 - 11:45 Anthony Beckett (UK)

"The True Colours of Mars"

Synopsis: Anthony Beckett will present the scientific evidence that shows that life is not unique to the planet Earth. In the 30 years since NASA sent biology experiments to our neighbouring planet, developments astrobiology and terrestrial biology clearly indicate that life has a foothold on Mars. Is an announcement on this discovery by either NASA or the Obama Administration imminent? We have reason to suspect NASA of holding back the release of this discovery. Is this over-cautious science hindering progress or power-brokers using this knowledge for political gain? Either way, it seems that the announcement of the biggest discovery in scientific history is well over due.

12:15 - 13:30 Richard D. Hall (UK)

"The Information War"

Synopsis: Over the last 3 years, Richard D. Hall has been researching UFO and related phenomena, trying to get to the bottom of what is really going on. After researching these areas it quickly became apparent to him that finding the truth is being made particularly difficult by attempts to cover up, dis-inform and lie about the reality of what is happening in our country and the world.

14:00 - 16:00 David Griffin (UK)

"Gary McKinnon and the Secret Space Program"

Synopsis: This presentation will examine other evidence sources that substantiate what McKinnon found and from an exopolitical perspective will discuss the impact of such a program on terrestrial culture and how it possibly effects any human/alien interaction. We'll also make the point that McKinnon's case is exopolitical in nature and represents the final symbolic struggle between power structures as far as Disclosure of the ET reality. David Griffin will present "Gary McKinnon and the Secret Space Program" on Saturday 7th August, 2010 at the Leeds Exopolitics Expo.

16:30 - 18:30 Richard Dolan (US)

"UFOs and the National Security State"

Synopsis: Historian Richard Dolan will analyse the patterns of UFO secrecy since the 1940s. Focusing on the national security aspects of the UFO phenomenon, Dolan will explain how it was a key factor in the creation of the U.S. "black budget," and hence a subversion of the traditional American political system. He will also discuss the paradox of how an end to UFO secrecy is both impossible and inevitable. Finally, he will outline the challenges and probable shape of a post-disclosure world. Richard Dolan will present his lecture on Saturday 7th August, 2010 at the Leeds Exopolitics Expo.

SATURDAY 7TH AUGUST – EVENING SPECIAL EVENTS

19:30 - 21:30 UK Film Premiere

12:15 - 13:30 Alan Foster (UK)

"Disclosure, Exopolitics and Planetary Changes"

Synopsis: We are at a turning point in our evolution. Globally, people are awakening to a cosmic reality, and organisations such as the 'Exopolitics Institute' and the 'Disclosure Movement' are advising and preparing for the implications of Open Disclosure and Contact. Using the evidence of UFO interactions and Crop Formation communications, Alan will illustrate that the wealth of existing eye-witness testimony and an exopolitical diplomatic perspective can help people through the coming revelations.

14:00 - 16:00 Mary Rodwell (AUS)

"The New Humans"

Synopsis: Mary Rodwell will present testimony from over 1600 cases, which indicates how advanced extra-terrestrial intelligences are preparing the human psyche to accept their presence on our planet. Will formal acknowledgement by world governments of an extra-terrestrial presence engaging the human race (Disclosure) take place by the time of the Leeds Exopolitics Conference?
